

Hydraulic Transmission Tester

Test the transmission with fluid under pressure, the Hydraulic Tester simulates operating conditions in the unit and finds problems instantly. The Hydraulic Tester finds hidden defects in soft parts or can alert you to hard parts that have grown out of tolerance. A simple hook up to a unit test plate and the reading of a single gauge allows you to test a transmission in or out of the vehicle

Part No. TOOL.139

Unit Test Plate for 6T40, 6T45, 6T50

Part No. 6T30.TOOL01

Teflon Ring Sizer & Installer Kit

This tool is made from high quality Stainless Steel and assists with the installation of the sealing rings for the Stator Shaft.

Simply place the rings on the resizing tool to expand them. This then allows you to slide the rings onto the proper grooves on the Stator Shaft. The tool can then be used to compress the rings back to their correct working diameter.

Without this tool installation is extremely difficult as these rings can be tricky to install.

The Pin included is used for the 6T70E Applications only, and is removed for all other applications.

Our Part No. 6T30.TOOL02

Drive Shaft Bush Installer

Used to install 6T30.BUS03
Left Hand Drive Shaft Bush

Part No. 6T30.TOOL03
